SUMMARY OF KEY QUALIFICATIONS

React • Typescript • Redux • Angular • Postgres • MySQL • Node/Express • NestJS • Webpack • Cypress • Cucumber • Storybook • Jest • Git • python

WORK EXPERIENCE

Software Developer | *SingleStone Consulting, Richmond, VA* August 2019 - Present

Capital One - Commercial Real Estate Management | Remote

Full Stack Developer (November 2020 - Present)

- Worked alongside team lead to mentor team members on Front End tech and best practices. This allowed the team to freely contribute within the full stack of the application comfortably.
- Integrated Capital One internal solutions that allowed the project to take advantage of tested and proven methods already established within other projects.
- Developed robust backend services using query management as a method to allow flexibility and extensibility to endpoint requests. This method allows for a GraphQL-like API interface which reduces the need for multiple requests within a page.

Andiron - Key Polarity Assessments | Richmond, VA

Full Stack Developer (January 2020 - November 2020)

- Acting as the team's Full Stack Developer, established system architecture that allowed for high levels of maintainability and structural recognition of components.
- Using spikes, communicated tech challenges, and presented detailed solutions to the team and stakeholders. This allowed for a more precise time line recommendation for MVP completion.
- Delivered features which automates the stakeholders process shortening turnaround time from 1 week per customer to a few seconds for a complete group as data becomes available.

VCU School of Nursing - CoursFacts | Richmond, VA

Test Automation/Front End Developer (August 2019 - January 2020)

- Implemented Frontend automated test suite utilizing the cypress testing library to increase test coverage and reliability to 95%.
- Included A11Y into each test suite to ensure 100% accessibility coverage of the application.
- Contributed to Frontend user-facing features using React to establish reusable components across pages.
- Showed application progression and communicated directly with stakeholders on feature delivery.
